## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 23-36 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 30, the prior art of the record fails to show or fairly suggest a dynamic range extension signal processing circuit, comprising wherein a gain value is set which determines a range of analog-to-digital converter (ADC) output values of the analog-to-digital converter for a corresponding range of variable gain amplifier (VGA) input values of the variable gain amplifier; and in response to one of the VGA input values reaching a trip point, which indicates that an ADC output value is out of the range, the logic circuitry decreases the gain value to a next lower gain value and reduces the one of the ADC output values to a lower ADC output value that corresponds to the next lower gain value and the one of the VGA inputs.

Claims 31-36 are allowed for the reason given in claim 30.

Claims 23-29 are method claims of apparatus claims 30-36, respectively. Therefore, claims 23-29 are allowed for the reason given in claims 30-36.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

*Conclusion*

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hwang et al. (US 6,922,209) discloses image apparatus and image signal processing method producing wide dynamic range.

Kim (US 6,587,144) discloses analog signal processing apparatus for digital camera.

Moore et al. (US 6,166,766) discloses sensing circuit for capturing a pixel signal.

Hieda (US 6,088,057) discloses image pickup apparatus with reduced signal noise.

Mangelsdorf (US 5,757,440) discloses method and apparatus for providing an offset level to an image signal.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to LUONG T. NGUYEN whose telephone number is (571) 272-7315. The examiner can normally be reached on 7:30AM - 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, DAVID L. OMETZ can be reached on (571) 272-7593. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
